

Step by Step Guide

How to use the “BETTER AFTER FIRE wipe” after your call

Step 1 – Face

Take a fresh wipe and start with your face. Thoroughly wipe from top to bottom, starting with your forehead, moving down your cheeks and nose before wiping your chin. Remember to pay attention to the hidden areas of your eyelids and around your nose and nostrils.

Step 2 – Neck

Thoroughly wipe your neck area.
Start at the front of your neck, move around the sides and be sure to wipe the back.

Step 3 – Ears

Moving on to your ears.
Start on the inside and work your way outside and wipe round the back.
Be sure to concentrate wiping in the creases of your earlobes along the way.

Step 4 – Head

Contaminants rest in your hair too.
Wipe your entire head starting at the back, moving the wipe over the top to the front.
Wipe all over your hair, and across from side to side.

Step 5 – Arms, Hands and Fingers

Proceed to wipe down your arms, including up to your shoulder beneath your sleeve, right the way down to your wrists. Thoroughly wipe your hands including both the palm of your hands and the back before moving on to your fingers. Methodically wipe each individual finger and your thumb. Pay close attention to ensure every fingernail is wiped clean.

Step 6 – Underarms & Body

Contaminants can sneak through your sleeves to rest under your arms, so it is important to clean that area of your torso. Take a wipe under your shirt and clean your underarms. Wipe around your body and across your abdomen before completing by blowing your nose clear.

The wipe is dermatologically tested by DERMATEST with excellent rating and is made from eco-friendly 100% biodegradable materials. Depending on the degree of contamination, we recommend the use of several wipes. Please dispose in regular waste.
