

### **Fit Test Adaptor Kit for Spectrum Tight-Fitting Full Facepiece**

The Occupational Safety and Health Administration (OSHA) (29 CFR 1910.134) requires an annual respirator fit test to confirm the fit of any respirator that forms a tight seal on the wearer's face before it is used in the workplace.

Fit test kits are not a component of the NIOSH approved respirator system and therefore not required to be produced by the same respirator manufacturer.

The Bullard Spectrum Tight-Fitting Full Facepiece is compatible with a 40mm generic thread adaptor.

You may consider the Fit Test adaptor from TSI "8025-CEN Adapter Kit for any 40mm Generic Thread (RD40)". Bullard has internally tested the TSI "8025-CEN" Adapter Kit and found it is compatible for use with Spectrum.
