

Bullard offers Eye Safety Systems (ESS) goggles as an NFPA 1971-2013 compliant alternative to fire helmet faceshields.

ESS goggles may be worn alone or in conjunction with a faceshield on all Bullard fire helmets. These high-performance goggles provide additional eye protection options that can address primary eye protection issues defined in NFPA 1500, OSHA Standards 29 CFR and ANSI/ISEA Z87.1 requirements. Goggles are designed to surround the eye and offer protection against wind, airborne debris and radiant heat.

Features and Benefits

Full perimeter filtered ventilation of the goggle frame

allows humid air to escape. This combined with anti-fog lens coating makes the goggle resist fogging better than any other goggle. Vent filters help keep dust particles and liquids out.

Ergonomic anatomical frame offers superior comfort and a snug, fully enclosed fit. The tough, impact-resistant frame also fits over most eyeglasses.

Modularity provides for quick replacement of straps and distortion-free lenses in less than 30 seconds. The speed clip strap adjustment system allows for rapid donning and doffing.

Lower cost for parts replacement over existing fire faceshields offers long-term cost saving solutions for maintenance and upkeep.

Ordering Information

CATALOG NUMBER	DESCRIPTION
IZ2	Innerzone 2B Structural fire helmet goggle with snap-on/snap-off mounting brackets for easy removal from the helmet. Nomex® goggle straps with speed clip adjustment, polycarbonate, surgical grade, replaceable, anti-scratch lens, full perimeter, ventilated high-impact frame.
